Lily

Achievements:

- Deepened Understanding of Localization: I gained significant insights into the impact of cultural adaptations on tourism guides for Chinese visitors.
- Quantitative Text Analysis Skills: I developed the ability to conduct text analysis using R, enhancing my ability to interpret and utilize textual data in research.
- Commitment to Reproducible Research: I learned the importance of maintaining rigorous standards in documenting and sharing scientific work.

Challenges:

- Mastering R Programming: The steep learning curve of R programming was a major challenge due to my limited background in computer science, but I find it's really interesting.
- Data Integration: Manipulating complex data sets to meet research objectives required meticulous effort and tested my problem-solving skills.

Overcoming Challenges:

- Structured Learning and Practice: I tackled the difficulties with R through structured learning, online resources, and peer assistance.
- Collaborative Learning: Engaging with peers provided crucial support, helping me navigate the complexities of data analysis.

Conclusion:

- This project significantly enhanced my technical and research skills, providing a strong foundation for my future academic and professional pursuits in language science.

Gratitude

- Thanks to Dr. Francom's well-organized materials and great teaching.
